Political Philosophy Reflection

One of the primary goals of this course is for you to become clearer on your political philosophy. Are you the typical Berkeley liberal who believes that the environment, social services for the needy, and nuclear proliferation are the most important issues? Or do you think the conservative wing of the Republican party is on to something where individuals need to take “ownership” of their own lives and not rely on the government?

**Essential Question: What is your political philosophy? What do you think the role of government should be in our lives?**
