

Leadership Council Agenda

March 2, 2006

5:00 Welcome, comings and goings, meeting roles
Facilitator: Annie; Note-taker: Rich; Time-keeper: Dave; Process Observer:
BayCES coach: observer and critical friend

5:10 Equity goal Discuss a proposal for a school-wide equity goal to address inequities in the math program.

Proposal from faculty:

100% of all students will pass at least two years of math

70% of all students will pass at least three years of math

50% of all students will pass at least four years of math

In order to accomplish this goal CP Academy would need to redesign the math program. We might want to give some principles to guide this process and ask for the staff to come back with a proposal in a given period of time. (30 minutes)

5:40 Data Based Decision Making

For both Equity and Achievement Goals, we need to monitor data to see if we are accomplishing them. What types of data do we want to look at? (e.g. attendance, discipline, homework). As there currently is no data management system in place at BHS or BUSD, what can we get on our own? What are the common measures that all small schools are being held accountable for? How can we get the data we can't access on our own? When will we sit down to do the data analysis? (30 minutes)

6:10 Program Articulation

Discussion of the CP Academy program 9th 12th grade (document from website on ACT, plus list of internships). How is our thematic focus expressed throughout the four years of our program? What are areas of programmatic strength, and what areas need further development? How are we planning that work? (30 minutes)

6:40 Goals for the remainder of the year.

Proposal for a student/parent/faculty leadership retreat to be held in early June 2006. (15 minutes)

6:55 Process check and debrief of meeting

7:00 Adjourn
