

Implications of Trimester System for CP Academy -- KWL

What we know:	What we want to know:	What we learned in the process:
<p><b>CP ACADEMY PRIORITIES:</b>                      CP Academy needs to hold onto AP Augmentation</p> <p>CP Academy faculty wants to put additional instructional time in math and English</p> <p>CP Academy faculty want to continue looping and heterogenous classes</p> <p>We want to add more science to our program.</p>		
<p><b>TRIMESTER:</b>                      A trimester system would be three 12 week trimesters each with <math>\pm 70</math> minute long classes.</p> <p>UCs and CSUs will count two trimesters as one year, 5 units per trimester class.</p> <p>Each student will be able to take three more 5 unit classes each year.</p> <p>The graduation requirements (number of units) will probably rise, but there will still be more room to provide academic support retake failed classes.</p> <p>We will be able to add an advisory class if we want to – the large school will probably do only 9<sup>th</sup> and 10<sup>th</sup> grades.</p>
